EXPERIENCE

Start Innovation Hub, Uyo — *Fullstack Developer*

MAY. 2026 - PRESENT

- Built responsive marketplace frontend using Nextjs, enabling vendors and customers to browse, order, and track deliveries in real-time
- Implemented order management system with real-time notifications using Firebase, handling order lifecycle from placement to delivery

Springwood Technologies, Uyo — *Frontend Developer*

NOV. 2023 - APR. 2026

- Integrated front-end interfaces with Node.js backend and APIs for seamless data flow
- Implemented SEO-friendly structures using Next.js, increasing visibility and site performance

Dynet Technologies, Uyo — *Web Developer*

SEP. 2022 - AUG. 2023

- Developed reusable and scalable UI components, reducing development time across multiple projects
- Optimized application performance through lazy loading, code splitting, and efficient state management

Jolena Events (Freelance), Houston — *Web Developer*

MAY. 2023 - JAN 2023

- Built responsive, mobile-first interfaces that enhanced user experience across devices
- Translated client ideas into functional, visually appealing digital products with strong UI/UX principles

EDUCATION

University of Uyo, Akwa Ibom State — *BSc.*

SEP. 2023 - NOV. 2027

Currently developing strong foundations in core areas including web development, databases, and software engineering, focusing on efficient data handling and user-friendly interface design.
